

ShopTodo — Shopping Cart

Document ID: SPEC-CART-001 | Version 1.0 | Specification for the workshop exercise
Scope for today: the shopping cart only. Product listing, checkout, order history, todo and profile are out of scope.

1. Purpose

A signed-in user collects products in a cart before checking out.

The cart is the user's working set. Adding, changing the quantity and removing must all be reflected immediately, and what the user sees must match what is actually held.

2. Roles

The application ships with demo accounts. The cart belongs to the signed-in user.

Role	Cart
Standard user	Has their own cart
Admin	Has their own cart

One user must never see another user's cart.

3. Language

The interface can be switched between English and Japanese at any time.

4. Acceptance criteria

4.1 Add to cart

#	Given	When	Then
A-1	The user is signed in and the cart is empty	They add a product to the cart	The cart shows 1 item
A-2	The cart contains at least one item	They open the cart	The cart total is greater than zero

4.2 Change quantity

#	Given	When	Then
Q-1	The cart contains a product	The user increases the quantity	The quantity shown for that product increa

4.3 Remove from cart

#	Given	When	Then
R-1	The cart contains a product	The user removes that product	A confirmation is shown

4.4 Cart and language

#	Given	When	Then
L-1	The cart contains a product	The user switches the language	The interface language changes

5. Out of scope for this exercise

Checkout, payment, order history, todo, profile, product search and category filtering.
